About the Speakers

John Beavers is a Partner, having served 11 years as managing partner, of the law firm of Bricker & Eckler LLP. In addition to heading its Counsel for BOARDS AND EXECUTIVES, he is chair of the Corporate Department. He is author of Ohio Corporations, The Lawyers Co-operative Publishing Co., and of numerous articles on audit committees and auditing, board responsibilities, board and executive compensation, mergers and acquisitions, Sarbanes-Oxley, and SEC and other public disclosure and reporting for Acredula, Business First, Corporate Board Member, Directorship, and other publications and periodicals. Mr. Beavers areas of practice include corporate and securities law, executive compensation and taxation, mergers and acquisitions, and strategic alliances, and board and executive governance and organization.

Greg Boyd is a President and Founder of Results Engineering and Data Dynamics, both Ohio based companies. Greg Boyd first began designing and implementing imaging and workflow systems in 1987, with strong skills in business process improvement, e-commerce, data warehousing, imaging, workflow, storage management, capture subsystems, electronic forms recognition, and application development. Greg Boyd has reengineered major business and government business processes designed and implemented new systems imaging and workflow systems for the Federal Reserve, Bank One, Sprint, Ameritech, U.S. Government Printing Office, CSX, Greif, dozens of courts, counties, state agencies and other public and private organizations.
